PROFESSIONAL SUMMARY

Detail-oriented Computer Science graduate with a specialization in Data Science and practical experience in data analysis, machine learning, and visualization. Proficient in Python, SQL, Pandas, Power BI, and machine learning frameworks, with experience transforming complex datasets into actionable insights. Strong analytical and problem-solving skills with hands-on experience in predictive modeling, data visualization, and AI-driven applications.

EDUCATION

Cochin University of Science and Technology

MSc Computer Science (with Specialization in Data Science)

Kochi, Kerala

Jun. 2025 – Apr. 2027

Sacred Heart College

BSc Computer Applications (Triple Main)

Kochi, Kerala

Jul. 2022 – May 2025

EXPERIENCE

IBM SkillsBuild Virtual Internship

Data Analytics Intern

Dec. 2024

Remote

- Learned industry-standard data analysis, visualization, and reporting techniques through expert-led sessions
- Completed hands-on masterclasses focused on practical data analytics and business intelligence workflows
- Developed skills in data interpretation, visualization, and professional report preparation using real-world scenarios

Klickevents Infosolutions

Python Intern

May 2024

Kochi, Kerala

- Utilized Python and Pandas for data analysis, data manipulation, and data visualization tasks
- Performed data preprocessing, cleaning, and exploratory data analysis (EDA) to extract meaningful insights
- Applied Python-based data analysis workflows for data interpretation, visualization, and reporting

PROJECTS

Federated Learning and Machine Unlearning Framework | Python, PyTorch, Federated Learning, Deep Learning

- Built a PyTorch-based Federated Learning framework with non-IID client data
- Implemented machine unlearning methods including GA, NG+, Loss-based NG+, and Fisher Forgetting
- Evaluated unlearning performance on MNIST and CIFAR-10 using accuracy and confusion matrices

Auto Traffic (Traffic Sign Recognizer) | Python, TensorFlow, CNN, Django

- Developed a Traffic Sign Recognition system using TensorFlow and CNN
- Performed image preprocessing including resizing, normalization, and augmentation
- Trained the model on the GTSRB dataset for traffic sign classification
- Deployed the solution using a Django web application

AI Resume and Portfolio Builder | Python, Gradio, Hugging Face, Transformers

- Developed an AI-powered web application to generate ATS-friendly resumes, cover letters, and portfolio content
- Integrated Transformer-based LLMs using the Hugging Face Inference API with a template-based fallback system
- Deployed the application on Hugging Face Spaces for students and freshers

CarbonAnalyzer: Personal Carbon Footprint Analyzer | Next.js, TypeScript, Tailwind CSS, Hugging Face, Recharts

- Developed an AI-powered web application to calculate and analyze personal carbon emissions
- Built interactive dashboards with real-time analytics, Eco Score, and a What-If Simulator
- Integrated the Hugging Face Inference API for personalized sustainability recommendations with a rule-based fallback system

TECHNICAL SKILLS

Languages: Python, C, C++, SQL, HTML/CSS

Core Skills: Data Visualization, Machine Learning, Deep Learning, NLP, LLMs, Prompt Engineering, Feature Engineering, Data Preprocessing

Libraries & Frameworks: Pandas, PyTorch, TensorFlow, Django

Tools: MySQL, Git, GitHub, Power BI, Microsoft Word, Microsoft PowerPoint, Microsoft Excel
